## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I. (claims 1-9) in the reply filed on 3/18/05 is acknowledged.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Miller'465.

The Miller'465 reference discloses a fuel blending apparatus comprising a first tank 22 for regular gasoline, a second tank 28 for ethanol, a proportioner/mixer 49, a computer 70, a computer input means 80 for selection of a preferred octane (see col. 4, lines 31-42) and a computer display means (96,98), wherein a selected octane has an implied representative percentage of additive and the method as claimed would be inherent during normal use and operation of the device.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Zinsmeyer references pertain to other gasoline blending systems with associated additive sources.
